International Day, 2011

How was International Day? It was great for me because that was my first time to participate in that party. About my participation, to be honest I wanted to give something special for the performances like singing or dancing, but I couldn't because I couldn't sing or dance well. My favorite part was when I looked at the performances of different cultures. There were so many beautiful costumes, and I ate food from many other countries. That was incredible. I had never tasted food like we did on International Day. Overall, I was really impressed because I didn't know all of the students were so talented.
