

International Day, 2011

I was very excited about International Day at Rinaldi Adult School because I had never experienced it before. There were some chances to participate in the Korean performance which showed the traditional dance and songs, but I couldn't do it because I couldn't attend school every day. But I had been hearing that there would be many kinds of performances and foods prepared, so I was eager to wait for that day!!

On International Day, I came out earlier than usual and went to school to meet my classmate, Kyung-soon. We went inside the auditorium and waited for the performance to start the same as other people. Many students from many countries showed us dancing, singing, and even how to fold up paper to make a bird! I was touched seeing the performances because I could see how hard they had worked to prepare the show. I enjoyed their music, dance, and beautiful costumes very much. Also, I was able to understand their cultures a little bit.

After enjoying the performances, there were lots of food stands to introduce the food from each country. Actually, I was looking forward to that

moment most of all because I really love to try new food. Passing many food stands, I received lots of food!! There were some kinds of food I had never seen. I really enjoyed all the kinds of food and finally I was full!!

I was happy to see the performances and food from many different countries. It was a very important time for us to get to know each other and understand other cultures.
